

Prospectus for Acquisition of Training Courses & Equipment

Overview

Modern Combatives is a privately owned entity that provides operational safety training to the public safety sector, established from over 20 years of training and operational experience. The focus is on the practical reality of the modern operational environment and a commitment to the safety of operational personnel.

We have developed an extensive range of training programs at both basic and instructor levels for a variety of operational roles, covering public safety operations, aggression management, personal security and first aid.

Our professional and comprehensive training programs set benchmark standards and are suitable for personnel at all levels. Developed for the reality of the operational environment, they are customised to current industry training standards and regulatory requirements.

Offer

We are pleased to offer for acquisition our entire range of training courses and equipment.

It is rare to have this scope of training programs offered with full resources in a complete package available as a single purchase. This is a unique opportunity for an established provider to expand existing operations, or a new provider seeking to enter the market. Acquisition entails complete ownership and copyright freedom, with resources provided in a format so the purchaser can use the courses as they currently exist or make any alterations they choose. The services of the course developer are available through consultation to assist with transition as required; however, this is not mandatory and there is no obligation to take up this option.

The items are offered with full disclosure and in good faith. Approval to deliver is the responsibility of the purchaser to organise with the relevant regulatory authorities, as are any required permits. The business name 'Modern Combatives' and associated domain name is not part of the offer.
